The new Watchdog. Bigger, Better, Faster

Live vision of all Victorian greyhound races and more detailed information for punters are some of the new features in the latest version of The Watchdog mobile form guide, released today by Greyhound Racing Victoria (GRV).

This latest version includes a dedicated live stream via Sky Racing for all Victorian greyhound race meetings.

It also boasts new and expanded in-depth form, including an animated early speed indicator for each greyhound on all Victorian race cards.

Other enhancements are a fixed odds market mover icon to denote the runner with the largest fixed odds market move and the ability to toggle fixed odds fluctuations in real time.

Existing functions such as Click To Bet, detailed form guides, expert selections, prize money details and TAB race replays have also been made easier to access.

GRV's GM Marketing, Louise Martin said the new Watchdog gave punters even more information at their fingertips when wagering on the sport in Victoria.

"It's always been GRV's plan to continually update The Watchdog to reflect the depth and strength of Victoria's greyhound racing offer and this new version of the app makes it one of the most comprehensive of its kind in the world," Ms Martin said.

Launched last year, The Watchdog app provides detailed form guides for every Victorian greyhound race and runner, expert analysis and tips, box statistics, suggested bets, a TAB click to bet function, race results and the latest greyhound racing news.

This free mobile app, which includes all the above mentioned new and existing features, is available at the Apple and Google Apps stores now.
